

Take Action: Protect America's Future

Local Town Hall Meetings – Demand Answers

→ Step 1: Explain Your Concerns

We need our representatives to understand why they should be on our side. They are lost—we need to give them direction. *United we stand, divided we fall. Which do they choose?*

Domestic Division

The Trump administration is creating chaos through executive orders, firing federal employees, and dismantling federal programs that working families rely on. At the same time, they are pointing fingers at marginalized communities, using divisive rhetoric, and fueling distrust among Americans. They want us to believe that we should fear each other more than foreign adversaries.

This is causing panic, fracturing our communities, and weakening the bonds that make us one nation. Instead of addressing real threats, Trump is using fear and division to consolidate power, leaving Americans vulnerable and distracted.

Geopolitical Division

While Trump divides Americans at home, he is aligning the United States with Russia—our longest-standing adversary. He is isolating us from democratic allies that have stood against authoritarianism since World War II, weakening the international alliances that have protected us for generations.

Trump's administration is not just neglecting our role as a global leader—it is actively undermining American influence in favor of Russian interests. Dividing the U.S. both domestically and geopolitically serves only one purpose: to make America fall. Trump wants this, and he is doing it in service of the Russian government.

→ **Step 2: Hold Our Leaders Accountable**

We need to know where our representatives stand. Are they committed to serving the American people, or are they prioritizing their party and personal power?

Ask your representative a simple question:

"Do you serve Americans, not the Russian government?"

Make them say it five times. Then press them further:

- Do they believe serving Americans is more important than winning elections?
- Is their loyalty to our country greater than their loyalty to their party?

If they hesitate, deflect, or refuse to answer, they are telling us everything we need to know. A true public servant should have no problem making this commitment—out loud, on the record, and without hesitation.

→ **Step 3: Share the Evidence**

If our representatives claim to serve Americans, they need to see the facts—clear proof that Trump is not on our side. His actions favor Russia over the United States at every turn. (See below)

→ **Step 4: Get a Commitment to Act**

Now that the evidence is clear, our representatives must take action. If they truly serve Americans, they must commit to removing Trump and his enablers from office.

Ask them:

- Can you look at this evidence and see the plan to destabilize American resilience?
- How does “United we stand, divided we fall” fit into this?

If they have a mission to serve Americans, they must protect Americans from a quiet Russian invasion. They must now begin working to remove Trump and his administration.

The Evidence: Alarming Ties Between Trump & Russia

A Comprehensive, Cited List

The Trump administration's policies and actions have consistently aligned with Russia's interests: weakening America's security, alliances, and democratic institutions. From dismantling federal efforts to counter foreign influence to halting military aid to Ukraine, the evidence shows a clear pattern of concessions to Russia. This page compiles verifiable reports that demonstrate how Trump's decisions have compromised U.S. national security, undermined democratic values, and empowered Putin's agenda. Explore the facts and decide for yourself where his loyalties truly lie.

Foreign Policy

Evidence that Trump is surrendering America in favor of Russia:

- Trump's hand picked Attorney General, Pam Bondi disbanded the Task Forces on Foreign Influence and Russian Sanctions on her first day in office.

Domestic policy

America has now switched sides in the Russia/Ukraine war. For the first time in American history we are siding with the invading dictator against democracy. All of our enemies throughout history have been dictatorships, and all of our allies have been democracies. Consider Trump's domestic policy through the lens of appeasing Putin, and things look a little different.

- Destroying the US economy
[New York Times: Trump's Tariffs Are Hurting the U.S. Economy](#)
- Selling hateful rhetoric about our neighbors
